Re: Letter of Recommendation for Sterling Communication and the RCare Emergency Call System

To Whom It May Concern:

Park Regency Loveland and Park Regency Thornton are both 3 story H shaped assisted living communities of over 100 residents each.

We did research on Emergency Response Systems that included a wireless pendent and bathroom pull cord that would not only alert us to resident location but also provide us with immediate reports of call data and historical reporting of all calls.

The system priced through Sterling Communications was substantially less expensive from the system we had been using which required a very expensive upgrade. The pendent itself is light, small, and water proof, a plus in our business. One could also wear the pendent as a watch on the wrist.

The service for any type question is always available, accurate and gets the issue resolved without long wait times.

I would wholeheartedly recommend Sterling Communication and the Response Care Emergency Response System for any size community needing this type of system.

You may call me for more information if desired at 303 589-6314.
